DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/19/06 has been entered.

2. Claims 1-17 remain pending and are being allowed.

Allowable Subject Matter

3. Claims 1-17 are allowed.

4. The following is an examiner's statement of reasons for allowance:

As Applicant points out in the RCE filed 12/19/06, the following claimed features are not shown or suggested by the prior art of record: The combined steps, in a method for generating code to perform anticipatory prefetching for data references, of:

- analyzing the code to identify data references to be prefetched;
- calculating an execution time of a single loop iteration which includes the identified data references, wherein the execution time includes an adjustment for the execution probability of the identified data references;

Art Unit: 2192

- calculating a prefetch ahead distance, wherein the prefetch ahead distance includes the ratio of outstanding prefetches to the number of prefetch streams and considers the probabilistically adjusted execution time of the single loop iteration, and wherein the prefetch ahead distance indicates how many loop iterations ahead to prefetch for;

- and inserting prefetch instructions into a preceding basic block of the code in advance of the identified data references based upon the prefetch ahead distance, wherein inserting prefetch instructions involves inserting multiple prefetch instructions for a given cache line, and wherein inserting the prefetch instructions involves, attempting to calculate a stride value for a given data reference within a loop, if the stride value cannot be calculated, setting the stride value to a default stride value, and inserting a prefetch instruction to prefetch the given data reference for a subsequent loop iteration based on the stride value;

- wherein the stride value is constant for some but not necessarily all loop iterations

These limitations are recited in each of independent claims, 1, 8 and 13; thus, all remaining claims are also allowed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
